

Subject: Loss Data expert for Tanzania (international)

Background and context

The United Nation Office for Disaster Risk Reduction (UNDRR) and the International Centre on Environmental Monitoring (CIMA) entered into a Grant Agreement dated 16 November 2020 for the implementation of the project "*Programme for a continental coordination, early warning, and action system in Africa*". Within this framework, CIMA is implementing an initiative devoted to the "*Capacitation of the United Republic of Tanzania EWS and integration in the Continental network*", working with three lead agencies: Disaster Management Department of Prime Minister Office, Tanzania Meteorological Agency and Ministry of Water.

The initiative aims at implementing the myDEWETRA Web-GIS platform in the United Republic of Tanzania in connection with the Continental Situation room of the African Multi-Hazard Early Warning System for DRR at the African Union Commission (AUC). Furthermore, the activity will focus on improving impact based Early Warnings by integrating the floods and drought risk profiles with the hazard forecasting system being implemented for the IGAD region (as part of the "*Programme for a continental coordination, early warning, and action system in Africa*") and extended to The United Republic of Tanzania. The early warnings messages will be harmonized at national level and supported by myDEWETRA Bulletin enabling the preparation and broadcasting of multi-hazard early warnings.

In this context, CIMA is looking for one (1) qualified and motivated international expert in Loss Data to support and complement the activities in UR Tanzania. Overall international expert support will require ensuring liaison and cooperation in representation of CIMA with officers of the national institutions and agencies involved in project implementation. Such cooperation by the international expert will take place under the coordination of and according to the indications received by the project management representatives.

Key responsibilities

Within the project context described above, the desired candidate will work, under the coordination and supervision by and following the instructions received from project management representatives, mainly focusing on the following sub-activities:

- integration and visualization of additional national data, including data related to United Republic of Tanzania from the DesInventar database
- Analysis of DesInventar database as source of information in support to the generation of impact-based EW

In particular, the desired candidate is expected to fulfill the following tasks throughout the project duration:

- Provide general assistance to CIMA Loss Data expert in liaising and interacting with officers in relevant institution of UR Tanzania.

CIMA Research Foundation - Fondazione CIMA

International Center on Environmental Monitoring - Centro Internazionale in Monitoraggio Ambientale

Campus Universitario - Via Armando Magliotto, 2 - 17100 Savona (IT) - info@cimafoundation.org - Tel. +39.019230271 - Fax +39.01923027240

P.IVA / VAT 01503290098 - C.F. / F.C. 92085010095

- Integrate existing loss data bases in different electronic format into DesInventar system.
- Analyze existing databases, gaps and recommendations toward a national database that can be used as a source of information for risk assessment and impact-based Early Warning.
- Connection of DesInventar Tanzania with myDEWETRA. Aggregation, visualization and presentation of data
- Support CIMA in the organization of meetings and engage with relevant stakeholders, with a special focus in support of the advisory mission of CIMA experts to Tanzania expected in November 2021.

The ideal candidates should have the following expected profile:

Education

- Advanced university degree (Master's degree or equivalent) in fields of study and research in areas relevant to disaster risk reduction or is required.
- A relevant first-level university degree in the above fields in combination with two additional years of qualifying experience may be accepted in lieu of the advanced university degree.
- Excellent verbal and written communication skills and capacity to work under pressure and short deadlines.
- Studies and/or knowledge in Database management and GIS is a plus.

Languages

- Knowledge of the local language and fluency in English (written and spoken) are required.

Personal skills

- Good organizer and planner.
- Liaison skills.
- Facilitation skills.
- Analytical skills.

Experience

- Direct and sound knowledge of loss data accounting, particularly of the DesInventar system

Further desirable assets could refer to:

- Experience in reporting
- Excellent skills in communication and team working

Overview of the assignment:

- Location: UR Tanzania
- Position open to international experts.
- Position: Loss Data Expert.
- Amount of work: 10 working days.
- Duration: up to 28 November 2021
- Remuneration: 5'000 US Dollars.
- Expected starting date: as soon as possible.
- Responding to: Loss data expert and Project manager at CIMA.
- Reporting to: Loss data expert and project manager at CIMA. Confirmation of utilized working days will be provided by appointed technical/managerial experts from CIMA.
- Possibility of a contract extension: no
