

Subject: Expert on Capacity building on Environment and Climate Change.

Background and context

CIMA Research Foundation, is a non-profit research organization promoting the study, scientific research, technological development and higher education in engineering and environmental sciences. Actives in the fields of civil protection, disaster risk reduction, climate change impact and aquatic and terrestrial ecosystems safeguard.

CIMA promotes the continuous improvement in early warning and risk reduction, through the implementation of research, applied research and cooperation projects at the national (Italian) and international scale.

CIMA Foundation has established a branch in Albania form 2011, that is in charge for implementation and supporting of different projects on the field of Civil Protection, Early Warning systems, disaster risk reduction, Environmental protection and climate change.

In this context, CIMA is looking for motivated young professional to support its activities in Albania, acting as Assistant Project Manager based in Tirana.

Initiative overview

CIMA Albania is involved in a national project called ECO Friends - **Environment and Climate Operative Friends**. This project is dedicated to strengthening cooperation between citizens, civil society organizations and Albanian public institutions involved in environmental protection and on issues related to climate change and disaster risk reduction in Albania.

The main aim of the project is to promote inclusive dialogue policies between citizens, organizations and public institutions, at national and local level. This will strengthen the trust and bond between citizens and civil organizations on the one hand, and between organizations and institutions on the other hand. Globally, this will support an improvement in the resilience of communities to climate change and help to create the necessary conditions for cooperation in the creation of new policies, closer to EU standards, on climate change and risk reduction.

Key responsibilities

The expert will required to provide technical support to the Action staff and public institutions on EU standards and Acquis transposition

The deliverable will be the organizing of three training one in each prefecture. The training will be focused on the three main topics:

- Presentation of Acquis process I Albania.
- Focused on chapter 27 of Acquis.
- Presentation of environmental policy scenario and an example of Eastern European Country advanced in Acquis.

The expert will be required to provide support to:

- Local and national public institutions in policy documents on DRR and Climate change.
